

**PROVO CITY ENERGY DEPARTMENT
ELECTRIC SERVICE SCHEDULE No. 13**

Small Cell Pole Attachments

AVAILABILITY

This schedule is available at any point on the Energy Department electric system where facilities of adequate capacity and standard voltage levels are available. The pole shall meet Engineering requirements and the Small Cell Infrastructure Design Standards

APPLICATION

This schedule is for electric service required for small cell installations. This schedule is applicable to electric service used for, but not limited to, metered and non-metered small cell infrastructure as specified in the Design Standards.

CHARACTER OF SERVICE

Service under this schedule shall be single-phase, 60 Hertz, alternating current at the Energy Department's available standard distribution voltage. At the option of the Energy Department, three-phase service may be provided. All service required on the premises by the customer will be supplied through one meter, exceptions approved by engineer. Standby or resale service is not permitted under this schedule. This rate is limited to a maximum demand of 1 kW. Customers on this rate exceeding 1 kW demand during one (1) of any continuous twelve (12) month period will be subject to Schedule 2 for not less than twelve (12) continuous months.

MONTHLY RATE

<u>Small Cell Installation</u>	<u>Watts</u>	<u>Rate Per Month</u>
Energy Only (no maintenance)	500	\$32.62
	1000	\$65.24

ELECTRIC SERVICE SCHEDULE No. 13 (Continued)

DEMAND METERING

The Energy Department reserves the right to install demand metering equipment to comply with this rate schedule.

POWER FACTOR

The Energy Department may, at its option, install metering equipment to allow the utility to determine the reactive components of power utilized by the customer. The customer's utilization of equipment shall not result in a power factor at the point of delivery of less than 90% lagging at the time of maximum demand. Should the power factor be less than 90% lagging during any month, the Energy Department may adjust the readings taken to determine the billed demand by multiplying the kW obtained through such readings by 90% and by dividing the result by the power factor actually established at the time of maximum demand during the current month. Such adjusted readings shall be used in determining the billing demand. The Energy Department reserves the right, at its option, to utilize kVA meters, kVAR meters, and / or other appropriate meters in those metering installations where the customer's power factor is believed to be unsatisfactory on a continuous basis according to the Energy Department's standards. If such meters are installed, the billing demand in kW or kVA may be computed from such instruments.

MINIMUM CHARGE

The minimum monthly charge shall be the Rate Per Month listed above under the Monthly Rate section.

TAX ADJUSTMENTS

The amount computed at the above Monthly Rate shall be subject to taxes, assessments and surcharges imposed by Provo City or any governmental authority authorized to levy said taxes, assessments or surcharges.

TERMS AND CONDITIONS

Service under this schedule will be in accordance with the Energy Department's electric service standards and policies and terms and conditions set forth by the Department's standard application requirements and Provo City Ordinances, including any future additions or amendments.
